

Dear Dr. Garoutte,

I wanted to write to you to express my personal thanks for the care & concern you showed to me & my entire family. Having been raised by a God who was a Dr., having 2 brothers who were Drs. and their marriage a Dr. I feel I have a clear understanding of how doctors should treat people. Your treatment of my family showed the devotion all Dr. should have & often don't take the time to give. Our lives touch people so briefly but have a lasting impact on those lives. You had this effect on us.

I wanted to thank you for giving my children & myself time to let go of . . . & adjust to our tragedy. The week in the hospital is just a blur to me at times, but I →

do remember all the compassionate care shown to all of us.

Thank you again for touching our lives.

Sincerely,
