

Dr. Garoutte.

Dropping in to tell you how good I felt after my surgery. I felt like a new person.

You just amazed me, that you did all of that surgery at one time. I'm so thankful that you did. It took all the worry off my mind. You are the Greatest!!

I thank you for all your hard work and your consideration.

I could have gone home on the same day I was feeling so good, but when the rash started I was glad I was in the hospital. I never hurt anywhere at any time.

The blockage had really been bothering me for about 2 months.

I thank you so much for every thing, also the information I received.

God Bless
